

220-701

CompTIA A+ Essentials (2009)

Exam: 220-701

Edition: 2.0

QUESTION: 1

Which of the following adapter cards is used to access the Internet through a telephone line?

- A. A network interface card
- B. An asynchronous modem
- C. A cable modem
- D. A T-1 connection

Answer: B

QUESTION: 2

Which of the following power supply standards was developed to provide a better way to plug into the motherboard?

- A. ATX
- B. AT
- C. PC/XT
- D. ACL

Answer: A

QUESTION: 3

When a job fails to print, where would a technician go in Windows to print out a test page?

- A. From the printers drivers
- B. Manually on the printer
- C. From the printer properties page
- D. From the administrative tools applet

Answer: C

QUESTION: 4

Which of the following ports are commonly used for outgoing email?

- A. NNTP
- B. TELNET
- C. SMTP
- D. HTTP

Answer: C

QUESTION: 5

Which of the following protocols are commonly used for Windows Remote Desktop?

- A. NTP
- B. PPTP
- C. RDP
- D. LDAP

Answer: C

QUESTION: 6

Which of the following transmission types allows for a NIC to send and receive data simultaneously?

- A. Half duplex
- B. Port mirroring
- C. Full duplex
- D. Port forwarding

Answer: C

QUESTION: 7

Which of the following network devices helps prevent data collision by not allowing data to be broadcast?

- A. Hub
- B. Modem
- C. Bridge

D. Switch

Answer: D

QUESTION: 8

Which of the following network devices interconnects networks together?

- A. Switch
- B. Hub
- C. Router
- D. Modem

Answer: C

QUESTION: 9

Which of the following network devices interconnects workstations and broadcasts the data that is being transmitted?

- A. Switch
- B. Modem
- C. Router
- D. Hub

Answer: D

QUESTION: 10

Which of the following is a difference between a local printer and a network printer?

- A. A local printer has a small footprint and cost less money than a network printer that has a large footprint.
- B. Local printers are situated in a common area shared by one department in the same office while network printers are always installed in enterprise environments where there are several offices in different buildings sharing the device.
- C. Network printers can be connected directly to a network while a local printer is connected directly to a users computer.

D. A maximum of two computers can share a local printer verses unlimited users can share a network printer.

Answer: C

QUESTION: 11

Which of the following is the difference between a laser printer and an inkjet printer?

- A. Ink jet printers are safe for the environment, while laser printers can be harmful to the environment.
- B. Laser printers melt the image onto the page, while an inkjet printer fuses the image to the page.
- C. Laser printers use toner, while the inkjet printer can only use ink cartridges.
- D. Laser printers fuse the image to the page, while an inkjet printer sprays the image on the page.

Answer: D

QUESTION: 12

Which of the following components is a distinguishing characteristic of a laser, inkjet, thermal, and impact printer?

- A. The writing element
- B. The control panel
- C. The power supply
- D. The interface.

Answer: A

QUESTION: 13

A customer reports that while attempting to print a document it seems to queue up fine, but the printer does not print the job. Which of the following may be the cause?

- A. Outdated or corrupt print driver.
- B. The application used to create the document is incompatible with the printer.
- C. A print job is waiting in the print queue.

D. Printer configuration is incorrect.

Answer: C

QUESTION: 14

Compliance regulations regarding data sensitivity are primarily created to protect the:

- A. equipment from abuse and misuse.
- B. company's intellectual property and proprietary information.
- C. person who would be directly affected in the case of a breach.
- D. customer's personal files and professional data.

Answer: C

QUESTION: 15

In regards to computer case form factors, which of the following provides the MOST room for effective cooling?

- A. BTX
- B. ATX
- C. NLX
- D. Micro ATX

Answer: A

QUESTION: 16

In terms of screen resolution, which of the following is the minimum default resolution setting that Windows XP supports?

- A. 640 x 480
- B. 800 x 600
- C. 800 x 640
- D. 1280 x 920

Answer: B

QUESTION: 17

A CD drive is a type of:

- A. solid state drive.
- B. network drive.
- C. optical drive.
- D. hot swappable drive.

Answer: C

QUESTION: 18

Which of the following is a primary storage device?

- A. DVD/RW drive
- B. SD flash drive
- C. SODIMM
- D. SATA hard drive

Answer: D

QUESTION: 19

The RAID level on a computer system refers to:

- A. how data is distributed between multiple drives.
- B. the number of partitions across multiple hard drives.
- C. the back up tape drive configuration.
- D. number of installed hard drives.

Answer: A

QUESTION: 20

Which of the following would be an example of an I/O interface?

- A. DIMM chip

- B. IDE drive
- C. AGP slot
- D. PS/2 port

Answer: D

QUESTION: 21

When purchasing an extra AC adapter for a notebook computer, it is important for the output to be:

- A. equivalent to the original power supply wattage.
- B. equal or greater than the original power supply wattage.
- C. auto sensing from 100 to 240 Volts.
- D. equal or lesser than the original power supply wattage.

Answer: A

QUESTION: 22

On a desktop computer, upgrading the power supply from a 200 watt power supply to a 400 watt ATX power supply results in which of the following?

- A. The addition of 3.3 volts of power to the computer.
- B. The computer can run faster because of the larger power source.
- C. Automatic integrated surge protection is provided through the upgrade.
- D. Automatic voltage detection between 110 and 220 voltage is provided.

Answer: A

QUESTION: 23

For a computer's core 2 processor to work properly, it must have which of the following?

- A. Thermal grease between the fan and the heatsink
- B. Thermal grease between the processor and the fan
- C. Two processors installed on the motherboard
- D. Thermal grease between the processor and the heatsink

Answer: D

QUESTION: 24

To run a Microsoft Windows 64-bit OS, the computer must be equipped with which of the following?

- A. Double the clock speed on a 32-bit processor
- B. Hyper-V technology
- C. Hyper-threading technology
- D. A 64-bit capable processor

Answer: D

QUESTION: 25

The DDR2 memory on a computer has failed. Which of the following statements is MOST likely true?

- A. The computer will not pass POST.
- B. The memory speed will decrease.
- C. The OS will have to be reinstalled.
- D. The computer will overheat.

Answer: A

QUESTION: 26

When installing a barcode scanner on a computer, which of the following should occur?

- A. The scanner must be configured to read the code(s) desired.
- B. The barcode scanner should be set up in the computers BIOS.
- C. The flatbed scanner must be removed.
- D. The scanner must be installed between the PS2 mouse and the computer.

Answer: A

QUESTION: 27

Which of the following is the purpose of a docking station for a laptop? (Select TWO).

- A. To allow peripheral devices such as a monitor to remain attached
- B. To allow additional power to be available to the laptop when docked
- C. To provide additional software security to the laptop
- D. To provide additional USB ports for the laptop
- E. To allow LAN/WAN switching

Answer: A, D

QUESTION: 28

Which of the following printer types is BEST suited to a multipart form?

- A. Impact
- B. Duplex
- C. Inkjet
- D. Laser

Answer: A

QUESTION: 29

The customer reports after the computer was upgraded the screen is blank and the computer beeps several times then stops responding. Which of the following is the possible cause? (Select TWO).

- A. A memory chip is defective.
- B. A PCI card is not correctly seated.
- C. The CRT display has failed.
- D. The power supply is not connected to the system board.
- E. Windows has a corrupt boot.ini file.

Answer: A, B

QUESTION: 30

The user states the desktop computer is very noisy. Which of the following could be contributing to the noise? (Select TWO).

- A. CPU
- B. Cooling fan
- C. Hard drive
- D. Motherboard
- E. Memory chip

Answer: B, C

QUESTION: 31

Which of the following boot methods results in the MINIMUM device drivers being loaded?

- A. Boot from LAN.
- B. Boot in Safe Mode.
- C. Boot to Last known Good Configuration.
- D. Boot from Emergency Boot Disk.

Answer: B

QUESTION: 32

An onsite technician is assigned to a small business for some emergency repair work. The repairs go as planned, but the owner of the company left specific instructions that they wanted to be notified post-repair of the status of the systems. Which of the following would be the BEST course of action for the technician to take?

- A. Call and/or email the owner the status of the repair and answer any remaining questions they might have.
- B. Document the work done at the firm; ask one of the assistants at the company to contact the owner, relaying details of the repair to save the technician time.
- C. Document the work done at the firm and leave the company owner a voicemail; the owner would probably not want to be bothered during the work day.
- D. Document the work done at the firm, leave a copy for the company owner, and personally contact the owner to update on the status of the repairs.

Answer: D

QUESTION: 33

A customer would like to build a Media Center PC for their home theater, and due to space constraints, asks to have a single-connection that will carry video and audio to and from the PC. Which of the following technologies is capable of this functionality?

- A. DVI-D
- B. DVI-I
- C. VGA
- D. HDMI

Answer: D

QUESTION: 34

Which of the following is the purpose of a heatsink in a PC's CPU?

- A. Keep the northbridge chip within acceptable temperature ranges.
- B. Keep the processor within acceptable temperature ranges.
- C. Keep the power supply within acceptable temperature ranges.
- D. Keep the hard drive within acceptable temperature ranges.

Answer: B

QUESTION: 35

Which of the following is the FASTEST external expansion card standard that a customer could find for a laptop?

- A. Mini-PCI card
- B. Express card
- C. PC card 8.1
- D. PC card 7.2

Answer: B

QUESTION: 36

In order to effectively use dual-channel functionality in modern DDR/DDR2/DDR3 memory, which of the following is true?

- A. Memory has to be installed in same speed and size modules, in marked matching slots.
- B. Memory has to be installed in matching pairs, using chips equal to or larger than 1GB in size.
- C. The motherboard jumpers need to be properly configured.
- D. Memory has to be installed in marked matching slots.

Answer: A

QUESTION: 37

Which of the following methods would be the BEST way to effectively destroy highly sensitive data from a hard disk?

- A. Use a multi-pass third party formatting utility, using at least five passes.
- B. Reformat the hard drive.
- C. Use Windows built-in Disk Management utility and format the disk.
- D. Run a high powered magnet over the drive several times.

Answer: A

QUESTION: 38

Which of the following broadband connections provides the LEAST amount of latency?

- A. WiMAX
- B. Fractional T1
- C. Satellite
- D. 56K dial-up

Answer: B

QUESTION: 39

A small business is looking to run new cabling for their upgraded network. Due to limited ability to conceal cabling within walls, the company is being forced to run the lines along

power wiring and overhead lighting. Which of the following would be the MOST cost effective cable to choose?

- A. UTP
- B. Coaxial
- C. Fiber
- D. STP

Answer: D

QUESTION: 40

Which of the following utilities would be the BEST place to check for installation problems?

- A. Security Center
- B. Device Manager
- C. Windows Defender
- D. Event Viewer

Answer: D

QUESTION: 41

A SOHO user wants to utilize computers with volume shadow copy to be able to recover accidentally deleted documents. Which of the following operating systems currently include this functionality? (Select TWO).

- A. Windows Vista Ultimate
- B. Windows 2000 Pro
- C. Windows Vista Business
- D. Windows XP Professional
- E. Windows Vista Home Premium

Answer: A, C

QUESTION: 42

A wireless network broadcasted from a SOHO WIFI single band router can have a maximum of how many SSIDs associated with it?

- A. One
- B. Two
- C. Four
- D. Five

Answer: A

QUESTION: 43

A laser printer uses which of the following consumables?

- A. Fuser
- B. Ribbon
- C. Toner
- D. Liquid ink

Answer: C

QUESTION: 44

Network hubs, by design, can run at which of the following modes?

- A. 100Mb
- B. Full duplex
- C. 10Mb
- D. Half duplex

Answer: D

QUESTION: 45

Which of the following commands will return the hostname of a specific device?

- A. ping t 172.16.122.11
- B. ping v 10.68.0.5
- C. ping a 192.168.10.5
- D. ping f 189.18.1.7

Answer: C

QUESTION: 46

Which of the following commands is used to open an editor to adjust the Windows database?

- A. msconfig
- B. edit
- C. regedit
- D. dir

Answer: C

QUESTION: 47

A Windows XP computer does not load all of the services required when it is booted normally. Which of the following is the MOST likely cause of the issue?

- A. MSCONFIG was used to execute the win.ini file.
- B. MSCONFIG was used to disable the computer services.
- C. MSCONFIG was used to execute the system.ini file.
- D. MSCONFIG was used to enable the computer services.

Answer: B

QUESTION: 48

Which of the following utilities is used to perform a baseline on a hard drive?

- A. PERFMON
- B. MSCONFIG
- C. MSTSC
- D. MSIEXEC

Answer: A

QUESTION: 49

A technician is adding RAM to a PC. Four 128MB DDR DIMM modules are removed and four 512MB DDR DIMM modules are inserted. Upon power on, the operating system will only recognize 1GB of RAM. Which of the following choices is MOST likely the cause?

- A. The PC BIOS does not support the new RAM size.
- B. The RAM has been inserted backwards in their slots.
- C. The monitor is not plugged into the video card.
- D. The BIOS revision is the latest version.

Answer: A

QUESTION: 50

A printer that was printing fine previously is not printing. The physical printer online light is lit, no errors are reported and the data cable is connected. Which of the following is the MOST likely cause of this problem?

- A. The Printing Preferences has been changed in Printer Properties.
- B. The Use Printer Offline option is checked.
- C. The Print Processor has been changed in Printer Properties.
- D. The Use Printer Offline option is not checked.

Answer: B

QUESTION: 51

Which of the following GUI interfaces displays total RAM installed in a Windows XP computer?

- A. Control Panel
- B. My Computer
- C. System Information
- D. System Properties

Answer: D

QUESTION: 52

Which of the following commands can be used to verify TCP/IP functionality?

- A. ping 128.1.1.0
- B. localhost 128.0.0.1
- C. ipconfig 127.0.0.1
- D. ping 127.0.0.1

Answer: D

QUESTION: 53

In which of the following is the Event Viewer located?

- A. Computer Management
- B. Performance Logs and alerts
- C. Device Manager
- D. Component Services

Answer: A

QUESTION: 54

In which of the following is the Services Snap-in located?

- A. Computer Management
- B. Device Manager
- C. Performance Logs and Alerts
- D. Component Services

Answer: A

QUESTION: 55

In which of the following locations is the Disk Management utility located in?

- A. Computer Management
- B. Device Manager

- C. Performance Logs and Alerts
- D. Component Services

Answer: A

QUESTION: 56

In which of the following is the Disk Defragmenter utility located?

- A. Performance Logs and Alerts
- B. Computer Management
- C. Component Services
- D. Device Manager

Answer: B

QUESTION: 57

Where would a technician place a shortcut in order for an application to run during logon?

- A. My Computer
- B. Startup Menu
- C. Control Panel
- D. System Tray

Answer: B

QUESTION: 58

Which of the following utilities is started when msinfo32 is entered in the run line?

- A. System Properties
- B. System Information
- C. Task Manager
- D. System Configuration

Answer: B

QUESTION: 59

Which of the following utilities is started in Windows XP when msconfig is entered in the run line?

- A. System Configuration
- B. System Properties
- C. Task Manager
- D. System Information

Answer: A

QUESTION: 60

Which of the following commands opens a utility that will display component driver versions?

- A. cmd
- B. dxdiag
- C. msinfo32
- D. msconfig

Answer: B

QUESTION: 61

Which of the following tools is located in the Control Panels Administrative Tools utility?

- A. Power Options
- B. Performance
- C. Hardware Wizard
- D. Simple File Sharing

Answer: B

QUESTION: 62

Which of the following tools can be found in the Administrative Tool Utility?

- A. Simple File Sharing
- B. Event Viewer
- C. Hardware Wizard
- D. Power Options

Answer: B

QUESTION: 63

Which of the following tools is located in the Administrative Tools Utility?

- A. Power Options
- B. Simple File Sharing
- C. Hardware Wizard
- D. Computer Management

Answer: D

QUESTION: 64

Which of the following is a class C IP address?

- A. 122.168.1.1
- B. 4.10.100.100
- C. 172.168.1.1
- D. 192.168.1.1

Answer: D

QUESTION: 65

How many characters are used in a 64-bit WEP encryption key?

- A. 10
- B. 12
- C. 26

D. 28

Answer: A

QUESTION: 66

How many characters are used in a 128-bit WEP encryption key?

- A. 10
- B. 12
- C. 26
- D. 28

Answer: C

QUESTION: 67

Which of the following is the MINIMUM amount of characters allowed for WPA encryption key?

- A. 8
- B. 10
- C. 26
- D. 28

Answer: A

QUESTION: 68

Which of the following is the MAXIMUM amount of characters used for a WPA2 encryption key?

- A. 8
- B. 16
- C. 63
- D. 64

Answer: C

QUESTION: 69

Which of the following wireless protocols provides the MOST bandwidth for streaming video data?

- A. 802.11g
- B. 802.11n
- C. 802.11b
- D. 802.11a

Answer: B

QUESTION: 70

Which of the following BEST describes what a KVM switch does?

- A. Allows multiple users to have access to a central gateway.
- B. Connects multiple users to one computer.
- C. Connects multiple computers to one monitor, keyboard, and mouse.
- D. Allows multiple computers to communicate with each other in a network.

Answer: C

QUESTION: 71

Which of the following devices converts digital to analog signals for communication between two different networks?

- A. Router
- B. DSU
- C. Modem
- D. CSU

Answer: C

QUESTION: 72

A user reports that their laptop computer shuts off about twenty minutes after turning it on, and that it gets unusually hot. The battery is full and the laptop is plugged in, and there are no error codes or beeps. Which of the following components is the MOST likely at fault?

- A. Fan
- B. CPU
- C. Battery
- D. RAM

Answer: A

QUESTION: 73

Which of the following safety tools prevents static electricity damage to internal computer components?

- A. Cable ties
- B. ESD strap
- C. MSDS
- D. Surge protector

Answer: B

QUESTION: 74

Which of the following BEST describes SPAM?

- A. Code that waits for a specific response before activating
- B. Unsolicited mail that is sent electronically
- C. Collects user and program information usually for malicious purposes
- D. Produces unsolicited advertisements via pop-up messages

Answer: B

QUESTION: 75

Which of the following BEST describes a type of file that appears harmless but is there to cause malicious intent?

- A. Worm
- B. Trojan
- C. Spam
- D. Logic bomb

Answer: B

QUESTION: 76

Which of the following malware is MOST likely to result in identity theft?

- A. Virus
- B. Worm
- C. Adware
- D. Spyware

Answer: D

QUESTION: 577

Which of the following BEST describes a network of computers inside a house that communicate with each other but not with computers outside of the house?

- A. WAN
- B. VPN
- C. LAN
- D. VLAN

Answer: C

QUESTION: 78

If a client has a Windows XP tablet PC, which of the following operating systems can they upgrade to and still keep the tablet PC functionality?

- A. Windows Vista Home
- B. Windows Vista Business

- C. Windows Vista Premium
- D. Windows Vista Ultimate

Answer: D

QUESTION: 79

How should a technician properly remove a USB hard drive while a computer is running?

- A. Unplug from the USB port.
- B. Safely Remove Hardware Function.
- C. Disable in the BIOS.
- D. Restart the OS.

Answer: B

QUESTION: 80

Which of the following steps will find an IP address?

- A. Start> Run>type cmd > nslookup
- B. Start> Run> type cmd > ipconfig
- C. Start> Run>type cmd> dir
- D. Start> Run> type cmd> goto

Answer: B

QUESTION: 81

A user has replaced an incompatible driver with one that is compatible. Which of the following is the FINAL step that should be performed?

- A. Cycle the power to ensure that the nt driver works
- B. Escalate the problem to the next higher tier support shop
- C. Establish a theory of probable causes of the incompatible driver
- D. Document findings, actions and outcomes

Answer: D

QUESTION: 82

It is a best practice to create which of the following after a Windows 2000 Pro OS install?

- A. An established recovery point
- B. A record of the administrative passwords
- C. A complete restore of the hard drive
- D. An emergency repair disk (ERD)

Answer: D

QUESTION: 83

A customer wants to use their laptop at a local hotspot that they have successfully used before; however, they are not receiving any WiFi signals. Which of the following should the technician do?

- A. Suggest they move computer around.
- B. Check to see if the NIC is functioning.
- C. Check that WiFi is enabled.
- D. Ask if they have a modem.

Answer: C

QUESTION: 84

Which of the following is a broadcast address?

- A. 169.254.10.127
- B. 192.168.1.1
- C. 127.0.0.1
- D. 255.255.255.255

Answer: D

QUESTION: 85

A technician wants to configure a Windows XP Pro laptop. It needs to write current work to memory and enter a low power state after fifteen minutes of no activity. The laptop also needs to be able to resume quickly from this mode. Which of the following power saving modes should a technician choose?

- A. Stand by
- B. Shut down
- C. Hibernate
- D. Suspend

Answer: A

QUESTION: 86

Which of the following laptop components allows connectivity with nearby devices using a PAN?

- A. NIC
- B. WiFi Card
- C. Bluetooth
- D. Broadband card

Answer: C

QUESTION: 87

How can a user continue a paused print job when using Windows XP?

- A. Right click on the print job and select properties.
- B. Right click on the print job and select resume.
- C. Right click on the print job and select cancel.
- D. Right click on the print job and select restart.

Answer: B

QUESTION: 88

A week ago a technician completed several upgrades for a business. The technician has not heard back from the client. Which of the following would be the BEST course of action to take?

- A. Email an assistant at the business to see if they are satisfied with the services rendered.

- C. Contact the customer with a follow-up call, inquiring how the systems are running and offering any additional assistance.
- D. Email the business owner and offer discounted services for the next system upgrades.

Answer: C

QUESTION: 89

A company customer calls in because the keyboard on their newly issued laptop is not working right. The customer had the laptop working properly all day in a docking station setting, but is now attempting to use the laptop's embedded keyboard. Which of the following is the NEXT action to take?

- A. Have the customer restart the computer to reset the keyboard for the customers profile.
- B. Question the customer to find if they used suspend instead of shutting down the computer when they left the office.
- C. Question the customer to determine if they are using the embedded keyboard for the first time.
- D. Check the keyboard drivers in Device Manager and reload if out of date.

Answer: C

QUESTION: 90

Which of the following would be the BEST device to replace a hub?

- A. Switch
- B. Modem
- C. Bridge
- D. Router

Answer: A

QUESTION: 91

Which of the following settings would a technician have to set in order to have a barcode reader perform a horizontal tab?

- A. /r
- B. /v
- C. /b
- D. /t

Answer: D

QUESTION: 92

A technician is trying to change the boot order on a laptop in order to install Windows Vista from a DVD. Where would be the proper place to configure this?

- A. PXE Boot Rom
- B. BOOT.INI file
- C. BIOS
- D. Hard Disk MBR

Answer: C

QUESTION: 93

A user reports a constant whining noise coming from their computer while it is on. Which of the following is MOST likely failing?

- A. Processor
- B. CPU Fan
- C. Optical Drive
- D. Hard Drive

Answer: B

QUESTION: 94

A technician has setup two disks in a RAID array of equal size. Which of the following RAID arrays is the technician using?

- A. RAID 1
- B. RAID 5
- C. RAID 6
- D. RAID 10

Answer: A

QUESTION: 95

Which of the following RAID arrays does only striped volumes?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 10

Answer: A

QUESTION: 96

Which of the following RAID arrays does stripping with parity?

- A. RAID 0
- B. RAID 1
- C. RAID 5
- D. RAID 10

Answer: C

QUESTION: 97

Which of the following cable types sends and receives data by the use of light?

- A. STP
- B. Fiber

- C. Coaxial
- D. UTP

Answer: B

QUESTION: 98

Which of the following cable types contains a foil shield inside the jacket?

- A. Fiber
- B. CAT6
- C. STP
- D. UTP

Answer: C

QUESTION: 99

Which of the following connectors is commonly used on CAT6 cable?

- A. RJ-45
- B. RG-6
- C. ST
- D. BNC

Answer: A

QUESTION: 100

Which of the following connectors is commonly used on CAT3 cable?

- A. RJ-11
- B. BNC
- C. ST
- D. RG-6

Answer: A

QUESTION: 101

Which of the following cable types have a single copper wire used for sending and receiving data?

- A. Coaxial
- B. UTP
- C. Fiber
- D. STP

Answer: A

QUESTION: 102

Which of the following Internet access types has the GREATEST amount of latency?

- A. Fiber
- B. Satellite
- C. DSL
- D. Cable

Answer: B

QUESTION: 103

Which of the following wireless types uses 5GHz frequency and can transmit data up to 54Mb?

- A. 802.11a
- B. 802.11n
- C. 802.11g
- D. Bluetooth

Answer: A

QUESTION: 104

Which of the following transmission mediums has the GREATEST speed?

- A. DSL
- B. Cable
- C. Fiber
- D. Satellite

Answer: C

QUESTION: 105

Which of the following computer infections allows several computers to launch attacks against a network?

- A. Spyware
- B. Botnet
- C. Spam
- D. Adware

Answer: B

QUESTION: 106

Which of the following malware types captures personal information?

- A. Botnet
- B. Spam
- C. Adware
- D. Spyware

Answer: D

QUESTION: 107

Which of the following malware types displays pop-up advertisements on a PC wanting a user to purchase something?

- A. Spam
- B. Spyware
- C. Botnet

D. Adware

Answer: D

QUESTION: 108

Which of the following malware types sends out email from a clients address book?

- A. Spyware
- B. Adware
- C. Worm
- D. Botnet

Answer: C

QUESTION: 109

Which of the following devices would BEST protect the clients equipment from power outages?

- A. Power strip
- B. Uninterruptible power supply
- C. Surge protector
- D. Grounded outlet

Answer: B

QUESTION: 110

Which of the following boot devices can a Live version of the OS be installed and tested on, without actually installing it on the workstation?

- A. CD
- B. Floppy
- C. Internal hard drive
- D. Network

Answer: A

QUESTION: 111

Which of the following protocols uses port 110 by default?

- A. FTP
- B. HTTPS
- C. SMTP
- D. POP

Answer: C

QUESTION: 112

Which of the following is a type of solid state drive?

- A. IDE hard drive
- B. DVD-ROM drive
- C. USB thumb drive
- D. SCSI hard drive

Answer: C

QUESTION: 113

Which of the following motherboards would be installed in a small form factor case?

- A. ATX
- B. Micro ATX
- C. AT
- D. NLX

Answer: B

QUESTION: 114

IEEE1394b is capable of transfer rates of up to:

- A. 12Mbps.
- B. 400Mbps.
- C. 480Mbps.
- D. 800Mbps.

Answer: D

QUESTION: 115

The voltage selector on the back of some power supplies allows a technician to select between which of the following?

- A. 110/120 Volts AC or 220/240 Volts AC
- B. AC or DC Voltage
- C. 6/12 Volts DC or 12/24 Volts DC
- D. 110/120 Volts DC or 220/240 Volts DC

Answer: A

QUESTION: 116

Which of the following is an advantage of using Plenum CAT5 cable when installing a network?

- A. Fire resistant
- B. Lower latency
- C. Increases length of cable
- D. Can be used with VoIP

Answer: A

QUESTION: 117

A Windows XP workgroup computer can have up to how many concurrent connections?

- A. 10 or fewer
- B. 15 or fewer
- C. 20 or fewer
- D. 25 or fewer

Answer: A

QUESTION: 118

A customer with a SOHO network reports one computer on the network does not have Internet access. In addition, the customer reports the NIC link lights for that computer are not on. Which of the following could be the problem?

- A. Firewall is not working.
- B. Internet site is down.
- C. Network server is not working.
- D. Switch is not working.

Answer: D

QUESTION: 119

After installing a network card, the technician notices a yellow exclamation mark in Device Manager. Which of the following is the NEXT step?

- A. Remove and replace the network card.
- B. Re-install the OS.
- C. Join the computer to the workgroup.
- D. Update the device driver.

Answer: D

QUESTION: 120

A technician needs to boot a computer with only the basic devices and drivers. Which of the following boot options will accomplish this?

- A. Boot Mode
- B. Enable Boot Logging
- C. Safe Mode
- D. Debug Mode

Answer: C

QUESTION: 121

After a computer starts it displays an error message NTLDR is missing. Where can the technician locate the NTLDR files?

- A. NTOSKRNL
- B. OS installation disk
- C. BOOT.INI
- D. NTDETECT.COM

Answer: B

QUESTION: 122

When a computer is turned on, which of the following is the FIRST process that runs?

- A. CONFIG.SYS
- B. NTLDR
- C. IO.SYS
- D. POST

Answer: D

QUESTION: 123

A technician is troubleshooting a laptop. After pushing the power button on the laptop the technician can hear the hard drive is spinning and the operating system start, but there is no video. Which of the following is the NEXT step to troubleshoot the issue?

- A. Upgrade the video card.
- B. Connect the laptop to a monitor.
- C. Replace the LCD.
- D. Upgrade the memory.

Answer: B

QUESTION: 124

A customer reports that a laptop does not start when the power button is pressed. When the laptop is plugged into an outlet it starts. Which of the following is the BEST solution?

- A. Replace the battery.
- B. Remove the battery.
- C. Replace the power button.
- D. Change power outlets.

Answer: A

QUESTION: 125

A client reports that their laptop will not power off when the power button is pushed. Which of the following could be the issue?

- A. The MBR
- B. The power-management console
- C. The AC/DC adaptor
- D. The battery

Answer: B

QUESTION: 126

A technician installs a new CD-ROM/DVD player into a laptop. The technician powers on the laptop and the drive is not detected. Which of the following should the technician do NEXT?

- A. Check to see if a disk is present in the drive.
- B. Check the manufacturer's recommended settings.
- C. Check the USB settings for the drive.
- D. Check if the drive is properly plugged in.

Answer: D

QUESTION: 127

A customer reports that a laptop starts running for a few minutes before freezing or shutting down. Which of the following is the MOST likely issue?

- A. The RAM is not seated properly.
- B. The system is overheating.
- C. The OS is not installed.
- D. Additional memory needs to be installed.

Answer: B

QUESTION: 128

Which of the following are examples of common techniques used in social engineering? (Select TWO).

- A. Requesting public information
- B. Insulting the subject to motivate a response
- C. Assuming a position of authority

- A. acquire unauthorized information to achieve a goal.
- B. to test sociological boundaries with in the company.
- C. to perform a technical risk assessment of employees within the company.
- D. engage in harmless communication.

Answer: A

QUESTION: 130

Where is the power on password stored?

- A. System RAM
- B. CMOS ROM

- C. Hard Drive
- D. System ROM

Answer: B

QUESTION: 131

Full duplex supports transmission of:

- A. printing on both sides of paper one at a time.
- B. printing on both sides of paper simultaneously.
- C. communications in both directions one at a time.
- D. communications in both directions simultaneously.

Answer: D

QUESTION: 132

Which of the following is the definition of telnet?

- A. A tool that allows a user to connect to other computers.
- B. A tool that allows a user to use the workstation as a telephone through the network.
- C. A tool that tells a user of the workstation that they have exceeded their memory quota.
- D. A tool that allows a workstation to tell the network that the workstation is present.

Answer: A

QUESTION: 133

Which of the following ports is used for telnet, by default?

- A. Port 21
- B. Port 23
- C. Port 25
- D. Port 110

Answer: B

QUESTION: 134

Which of the following is the POP3 port used for?

- A. It pings a workstation from a remote server.
- B. It holds a log of the last three passwords used.
- C. It blocks popup ads.
- D. It retrieves email from the mail server.

Answer: D

QUESTION: 135

Which of the following ports is used by POP3, by default?

- A. Port 21
- B. Port 23
- C. Port 25
- D. Port 110

Answer: D

QUESTION: 136

A workstation has been experiencing intermittent system problems. The user described the problems as: occasional rebooting, overheating, electric shock felt on computer case, and the hard drive stops working. Which of the following is the cause?

- A. Processor is going bad
- B. RAM module is faulty
- C. Power supply
- D. UPS not working properly

Answer: C

QUESTION: 137

Drive thrashing is described as which of the following?

- A. Excessive movement between system memory and virtual memory.
- B. Any damage to a hard drive caused by an intention or unintentional jolt or movement.
- C. A recognized method of disposing hard drives that contain sensitive data.
- D. A method of recovering lost data from a hard disk.

Answer: A

QUESTION: 138

Which of the following can be used as a boot device upon startup? (Select TWO).

- A. Wireless router
- B. USB
- C. Network
- D. Printer
- E. System RAM

Answer: B, C

QUESTION: 139

Which of the following allows a technician to boot from a special device upon startup?

- A. Function keys (e.g. F9, F12)
- B. Shift + B
- C. Ctrl + Alt + B
- D. Windows Key + B

Answer: A

QUESTION: 140

- A. Dispose in an incinerator.
- B. Store in an air-tight container.
- C. Put the toner into a sealed bag and then throw into the garbage.
- D. Return to the manufacturer for recycling.

Answer: D

QUESTION: 147

When applying the security settings to a network, which of the following is the MINIMUM number of failed login attempts before a user is locked out?

- A. One
- B. Three
- C. Seven
- D. Nine

Answer: B

QUESTION: 148

The foil shielding on a STP cable is there to:

- A. prevent damage from weather.
- B. provide protection from heat.
- C. assist with data transmission.
- D. prevent outside interference.

Answer: D

QUESTION: 149

A network that has no server controlling the computers is known as a:

- A. LAN
- B. domain.
- C. WAN.
- D. workgroup.

Answer: D

QUESTION: 150

A user reports that their CD-Rom is not reading a disc. What should be the BEST first step to resolve this issue?

- A. Make sure that the disc is a CD and not a DVD.
- B. Ensure that the CD drive is installed.
- C. Check to see if the BIOS register the drive.
- D. Check to see if the CD-Rom is compatible hardware.

Answer: B

QUESTION: 151

When a component has a proprietary power supply what is the main limitation?

- A. There are no limitations; one power supply is as good as another.
- B. Replacing it with a power supply made specifically for that unit.
- C. Making sure the power supply will fit into the casing.
- D. Making sure that replacing the power supply is not cost prohibitive.

Answer: B

QUESTION: 152

A user calls with a concern about network performance, which of the following would be the FIRST step to evaluate this issue?

- A. Make sure the network cable is seated properly in the users computer.
- B. Check to see if the network cables were terminated properly.
- C. Ensure that shielded cable was used for the network.
- D. Make sure that the network cable is not touching any other cables.

Answer: C

QUESTION: 153

Certificate based security for a network would involve the use of:

- A. background checks for users.
- B. smart cards.
- C. complex user names.
- D. retinal scans.

Answer: B

QUESTION: 154

Which of the following is a best practice to create during an OS installation?

- A. A complete back up of the hard drive.
- B. An established recovery point.
- C. An emergency recovery disk (ERD).
- D. A record of the ADMIN passwords.

Answer: C

QUESTION: 155

A remote customer calls and says their computer and monitor will not turn on. The customer has tried the power buttons on the computer and monitor multiple times and still the computer and monitor will not turn on. Which of the following would be the BEST questions to ask the customer? (Select TWO).

- A. Is another piece of equipment, that is plugged into the same power strip/surge protector, powering up?
- B. Did the computer and monitor work before?
- C. Was the electric bill paid?
- D. Is it a LCD or CRT monitor?
- E. What is the manufacturer of the power strip/surge protector?

Answer: A, B

QUESTION: 156

A remote Customer calls with a dead computer. The customer says the tower computer will not turn on and the monitor will not turn on either. Other equipment plugged into the same power strip/surge protector also will not turn on. What would be the questions to ask this customer? (Select THREE).

- A. How big is your electric bill?
- B. Is another piece of equipment plugged into the same power receptacle and is it working?
- C. Can you or someone else check the circuit breaker for that receptacle?
- D. What is the manufacturer of the power strip/surge protector?
- E. What is the manufacturer of the other equipment plugged into the power strip/surge protector?
- F. Has any electrical work been done recently?
- G. What kind of equipment is plugged into the power strip/surge protector?

Answer: B, C, F

QUESTION: 157

Which of the following should be recommended prior to any solution that you will implement?

- A. Make a list of all programs that will need to be reinstalled in event of a system failure
- B. Nothing, proceed with solution. Nothing should be affected
- C. Create restore point
- D. Perform backup of all data

Answer: D

QUESTION: 158

Which of the following power management settings will require the power button to be pressed to bring a computer back to a usable state by default?

- A. Always on
- B. Hibernate
- C. Standby
- D. Wake on LAN

Answer: B

QUESTION: 159

Which of the following power management settings will allow any key press or mouse movement to bring a computer back to a usable state by default?

- A. Standby
- B. Always on
- C. Wake on LAN
- D. Hibernate

Answer: A

QUESTION: 160

While working on a computer at a customer's home, the customer continually asks questions about every step being performed. It is getting to the point that is becoming a distraction. Which of the following is the BEST solution?

E. Check for other equipment plugged into the same power strip/surge protector.

Answer: A, C

QUESTION: 175

A remote customer reports the mouse cursor is moving erratically on the screen or not at all. Which of the following questions should a technician ask this customer? (Select TWO).

- A. If the mouse has roller ball underneath could they examine it?
- B. What mouse driver are they using?
- C. What is the manufacturer of the computer?
- D. What type of mouse is it?
- E. What is the manufacturer of the mouse?

Answer: A, D

QUESTION: 176

There is excessive heat near the back of a computer. Which of the following should be checked?

- A. Hard drive location in the computer.
- B. Remove unneeded external components.
- C. Failed fan in the power supply.
- D. CPU heatsink seated properly.

Answer: C

QUESTION: 177

A customer states that the computer is taking a long time to boot and the hard drive light is staying on constantly. Which of the following should a technician check to resolve the issues?

- A. The manufacturer of the RAM installed in the computer.
- B. The manufacturer of the computer and hard drive.
- C. The hard drive location in the computer.

D. The amount of RAM installed.

Answer: D

QUESTION: 178

Which of the following MOST likely uses a parallel port?

- A. Connecting a loop-back plug
- B. Printing to an older printer
- C. Connecting to a parallel tape backup device
- D. Connecting to a parallel modem

Answer: B

QUESTION: 179

A technician is getting ready to perform a repair installation of Windows. Which of the following should be done FIRST prior to the installation?

- A. Create a restore point.
- B. Perform backup of all data.
- C. Upgrade all drivers.
- D. Update the anti-virus software.

Answer: B

QUESTION: 180

A technician has replaced an incompatible driver with one that is compatible. Which of the following is the LAST step that should be performed?

- A. Cycle the power to ensure that the nt driver works.
- B. Establish a theory of probable causes of the incompatible driver.
- C. Document findings, actions and outcomes.
- D. Escalate the problem to the next tier support.

Answer: C

QUESTION: 181

Which of the following power management settings allows volatile data to be written to a hard drive before powering off?

- A. Wake on LAN
- B. Always on
- C. Standby
- D. Hibernate

Answer: D

QUESTION: 182

Which of the following power management settings will allow a user to press any key or mouse movement to bring the computer back to a usable state by default?

- A. Standby
- B. Always on
- C. Hibernate
- D. Wake on LAN

Answer: A

QUESTION: 183

While a technician is working on a computer at a customer's home, the customer is asking questions wanting to know every step being performed and why. It is getting to the point that is becoming a distraction. Which of the following is the BEST solution?

- A. Ask to be excused to use the phone to take a small break outside to get some air.
- B. Explain that what is being done is extremely complicated and requires concentration.
- C. Send them off on a small task to get a moment to concentrate and finish the job.
- D. Continue answering the questions, relax and try to be as calm as possible while working.

Answer: D

QUESTION: 184

A CRT has stopped working. Which of the following should the technician do?

- A. Put on an ESD strap and inspect the internal components.
- B. Check that the tube and capacitors are intact.
- C. Throw it in the trash; CRTs are being replaced by LCDs.
- D. Dispose through proper channels or send it to be repaired.

Answer: D

QUESTION: 185

Which of the following is the MINIMUM amount of characters Windows XP will allow in a password?

- A. Zero
- B. Six
- C. Eight
- D. Twelve

Answer: A

QUESTION: 186

Two workstations, two monitors, two printers, and a mini refrigerator are plugged into one power strip in a single outlet. Which of the following should be done to ensure safety?

- A. Move the printers to their own UPS to cut down on the amount of devices going to the outlet.
- B. Move some of the devices to other outlets and replace the power strips with surge protectors.
- C. Replace the power strips with UPSs and eliminate the extension cords.
- D. Replace the power strips with surge protectors with longer cords.

Answer: B

QUESTION: 187

In an office there is a concern that the power occasionally spikes and blacks out for a second or two during the day. Which of the following can be done to ensure that the workstations are not damaged and do not lose power?

- A. Install a generator in the office.
- B. Install a UPS in the office.
- C. Replace the CMOS batteries to all affected equipment.
- D. Install power strips in the office.

Answer: B

QUESTION: 188

Computers are left on overnight to complete certain calculations and tasks. There are UPSs connected to the equipment but they only last about thirty minutes. Which of the following will BEST ensure that no damage occurs to the system in the event of an extended power outage?

- A. Have employees shut down their computers before they leave and perform the calculation during their down time.
- B. Install software that saves work, closes programs, and properly shuts down the computer.
- C. Setup a hot site for the office so all data will be backed up.
- D. Have an employee work nights to perform the shut down.

Answer: B

QUESTION: 189

A user has changed something on their workstation that is affecting the operability of the OS. Which of the following actions should the technician perform FIRST?

- A. Load a full backup onto the workstation.
- B. Restore all files from a storage device.
- C. Roll back to a previous restore point.
- D. Prepare system for automated system recovery (ASR).

Answer: C

QUESTION: 190

A customer has attached a laptop to a portable projector. Each time the customer closes the laptop the computer goes into standby. Which of the following should the technician do to solve this issue?

- A. Press the function key and then configure the projector settings.
- B. Change the power settings on the projector.
- C. Change the power settings in power management.
- D. Change the computer from a laptop to a desktop.

Answer: C

QUESTION: 191

A customer reports that after connecting a laptop to a projector they can see their presentation on the laptop but not on the projector screen. Which of the following should the customer perform?

- A. Use the function + f8 key to toggle between screens.
- B. Use the function + f10 key to toggle between screens.
- C. Use alt + tab to toggle between screens.
- D. Reboot the laptop to toggle image between screens.

Answer: A

QUESTION: 192
