

One Last Opportunity

When to Buy ANY Stock in the Market... For MAXIMUM Potential Profits

Warning: DO NOT LEAVE THIS PAGE

Dear Reader,

Keith Kaplan here, with another incredible opportunity for you today.

At the beginning of our presentation, I mentioned my company, TradeSmith, prior to engineering An-E, had produced one of the smartest predictive technologies in the world... an innovation called *TradeStops*.

And what *TradeStops* enables you to do is *time* any stock on the market with incredible accuracy.

That is, it can show you when to buy or sell any stock...

That could be a stock you already own... or one you've been researching and are considering buying.

Why is this so powerful?

Because by merely getting the timing right, you can "boost" the returns of any stock by huge margins, sometimes by as much as 10X!

Remember GameStop?

The crazy story from back in 2021... when a bunch of rogue investors "stuck it" to Wall Street by buying up shares of the retail gaming company's stock, while Wall Street was betting it would go down.

Wall Street lost billions as the stock skyrocketed.

And some individual investors made fortunes.

You could have been one of them... if you timed it right.

And *TradeStops* would have helped you do that.

TradeStops' buy and sell alerts would have gotten you in and out of GameStop for 1,124% gains!

GameStop Corp. (GME)

Or take the company MicroStrategy.

Its stock was flat for years.

Most folks probably dismissed it.

Which is too bad, because you could have made huge gains on it.

Again, if you timed it right.

Which, like GameStop, *TradeStops* could have also helped you do.

It would have gotten you in and out at the right time for 418% gains.

MicroStrategy Incorporated (MSTR)

This is how important *timing* is when it comes to making money in the markets.

In fact, even if you get pretty much everything else wrong, and just get that right, you can become extremely wealthy.

Unfortunately, most folks don't know this one simple truth... and don't know *TradeStops* is the best tool to help them capitalize on it.

But *TradeStops* isn't a *total* secret.

Over the years the word has gotten out...

And today, around 86,000 everyday folks use *TradeStops* to help improve their timing (all told, that's \$30 billion in assets!)

After using *TradeStops* for a while, user Bob D. said:

“These alerts have been an invaluable aid to my stock trading. Without them, I certainly would have faced some big losses. They’ve also prevented me from selling too soon. Thanks for a great product.”

– Bob D.

Matt says:

“I have never had more fun in the stock market. I am one of your [elite] members, and this has been a joy. You’ve helped me with my 401(k), and I have had a great run. Could not be easier. Thank you for all of your help.”

– Matt

And Steven C. wrote in to say:

“This has been a godsend. When the pandemic downturn happened, the losses on my stocks were limited, and TradeStops allowed me to re-enter the stock market in a timely way.”

– Steven C.

And that's just the feedback we've received from everyday folks.

Recently, we decided to put *TradeStops* to the ultimate test and ran some backtests to see if it could have helped improve the recommendations of one the best stock analysts in America (a former Wall Street top trader).

And, believe it or not, it would've. Also, by a huge margin.

Here's a company he recommended called Pacific Biosciences...

Pacific Biosciences of California, Inc. (PACB)

And he made 50% on the trade.

Not bad.

But, using *TradeStops* to help improve his timing could have handed him a 569% gain.

A more than 10X improvement!

It's the same thing with a company called Magnite.

The trader we worked with recommended Maginte for a 30% gain.

Magnite, Inc. (MGNI)

But, by using *TradeStops* to improve his timing, he could have turned that 30% gain into a 349% gain.

Another 10X improvement!

And these are just examples of individual stocks.

TradeStops can also help improve the performance of your overall portfolio. And also, not just by a little... But, by a huge margin!

Here's an investor who made \$46,000 over the course of two years.

Not bad.

But, like the examples I showed earlier, it's all relative.

Because of bad timing, we often “leave money on the table” without realizing it.

That’s what this gentleman did.

He could have made \$433,000 instead of just \$46,000... a 10X greater return...

And *TradeStops* would have showed him how.

Real Investor #2: 10X Higher Profits!

Here’s another example...

This investor, however, instead of just making extra money could have also *saved* himself a fortune.

He lost a whopping \$1.4 million!

But, with just proper timing — not changing the actual stocks he owned — just buying and selling them at a more optimal time using *TradeStops*...

He could have turned a \$1.4 million LOSS... into a \$368,000 GAIN!

Real Investor #3: Turn A \$1.4 Million Loss... Into a \$300k Gain!”

Here’s the bottom line:

An-E can make you huge short-term gains. Remember, it targets trades with a one-month time frames.

And we’re so happy to have you as a member. You made a wise financial decision.

But if you want to take your longer-term investing to the next level.

TradeStops could give your investing results a HUGE boost...

Plus, potentially save you *hundreds of thousands* of dollars in the months to come.

I highly encourage you to check it out.

Which is why I've arranged for you to receive a FULL 12 MONTHS of access to *TradeStops Plus* (which includes access to our *TradeStops* market timing algorithm plus several other incredible features)—for more than 80% OFF the normal price.

In other words... while a year of *TradeStops Plus* normally costs \$588 a year...

Through this one-time-only offer, you can try a full year for just \$79.

This is likely the biggest “no-brainer” we’ve offered you today.

And again, you are ONLY seeing such an extreme discount because you’re a new subscriber to *Predictive Alpha*.

TradeStops Plus is simply the best tool there is for helping individuals *time* their trades.

One user, Larry R., told us:

“TradeStops has become so valuable to me that I would likely give up doing my own investing if I lost it as a tool.”

– Larry R.

And you have one chance right now to get risk-free access... for a *small fraction* of what others usually pay.

Here’s everything that’s included if you act now:

FEATURE #1

When to buy or sell every stock, ETF, or mutual fund on the market.

The proprietary algorithm that powers *TradeStops Plus* scans the market every single day and calculates the right time to buy, or lock in gains — based on the stock’s history, level of volatility, and recent behavior.

You can simply go online and type in any ticker symbol, and *TradeStops* will show you when to buy and sell.

FEATURE #2

Customizable “buy” and “sell” alerts.

With a few clicks of your mouse, you can set up alerts that are sent straight to your phone and email when it’s time to SELL or even BUY BACK INTO any stock in the market.

TradeStops doesn’t execute the trades for you, of course.

But it will immediately show you whether a stock is in “buy mode” or “sell mode” — so you can quickly make an informed decision.

FEATURE #3

The Position Size Calculator

This tool is going to be your new investing best friend.

It can instantly calculate the ideal position size for each stock you buy, based on your personal financial goals and your portfolio as a whole.

All you have to do is enter a few quick details — and you'll know exactly how many shares to buy of ANY stock you're considering.

FEATURE #4

The Newsletter Center

A lot of *TradeStops* users subscribe to financial newsletters to help them pick stocks — just like you!

So, they created a feature where you can actually link your subscriptions to your *TradeStops* account...

And immediately monitor all of your new recommendations, so you know the perfect moment to buy in... *how much* to buy... and when to lock in any gains.

And to sweeten the deal even MORE...

If you act right now through this one-time-only offer, we'll also include a FREE BONUS special report from the *TradeStops* team:

Special Report:

When to Sell the 50 Most Popular Stocks

This report goes over how *TradeStops* can help optimize your portfolio — everything from how it can help you determine how much of each stock to buy, how it can help you gauge the health of every stock you own (and every stock on the market) to know when to buy and sell, and the steps you can take to decrease the overall risk of your portfolio.

Our *TradeStops* algorithm is constantly scanning the market to determine the best stocks to buy now. To go along with this special report, we've created a special watchlist called *The Top 50 Tracker* that will list 50 of the most popular stocks. This feature will be housed right in your *TradeStops* watch portfolios page, so you'll be able to see it easily every time you log in.

Again, this report is yours totally FREE if you take me up on this extraordinary opportunity.

So now, the choice is yours.

This is your one chance to claim 12 months of access to *TradeStops Plus* — for just \$79.

And please note: You are risking NOTHING to give it a try.

You have the next 60 days to check out all of your new features, track your portfolio, and review your bonus research.

If you decide it's not for you, you can immediately cancel for a full CASH refund for your subscription.

But after being in this business for years, I'm confident you'll join the tens of thousands of real investors who LOVE *TradeStops*.

Like user Hal C., who says:

“TradeStops might just be the best investment I have EVER made in my three decades of investing. I can't say enough about the website, and especially the professional and friendly customer support.”

– Hal C.

To get started, click the big “YES” button below.

We'll simply add 12 months of *TradeStops Plus* to your order for an additional \$79.

Sincerely,

Keith Kaplan,
CEO, TradeSmith

YES!

Give me my 87% discount for one year of
TradeStops Plus at \$79

[No — I acknowledge I'll never see this again](#)

It's a totally done-for-you software that actually works *inside* your portfolio — monitoring your investments 24 hours a day, 7 days a week
